3568907 - How to create a Support User for SAP Business Data Cloud Systems

Component: BDC-CPT (Business Data Cloud > BDC Cockpit), Version: 6, Released On: 04.12.2025

Symptom

SAP Support requests a Support User to access SAP Business Data Cloud Tenants for troubleshooting purposes.

Environment

- SAP Business Data Cloud
  - SAP Datasphere
  - SAP Analytics Cloud
  - SAP People Intelligence

Resolution

For different SAP BDC scenarios, SAP Technical Support might need support users for multiple systems.

General Recommendation

Enable Support User creation for BDC Cockpit, Datasphere and SAC tenants involved in the scenario.

- Enable SAP Support User creation for the BDC Tenant (BDC Cockpit - System → Administration → System Configuration → Allow SAP support user creation) **and**
- Enable SAP support user creation for SAC Tenant. Refer to KBA 3200458 - Creating Support Users in SAP Analytics Cloud **and**
- Enable SAP support user creation for DS Tenant. Refer to KBA 2891554 - How to create a Support User in SAP Datasphere, refer to Option #2

If it can be determined that access to other tenants are not needed, also follow along with the scenario specific requirements below.

Scenario #1 – Only Access to the BDC Cockpit is needed

- **Option #1**
  - **Enable Support User Creation by SAP Engineers as described in Navigating in SAP Business Data Cloud (Administration - System Configuration)**
    - **SAP BDC Cockpit: System → Administration → System Configuration → Allow SAP support user creation**
- **Option #2**
  - Use the "Create Support User" from SAP Business Data Cloud Cockpit Home Page
    Make sure that the necessary Scoped Roles (like BDC Administrator) are assigned to the newly created support user
    SAP Help Portal Documentation: Standard Roles Delivered with SAP Business Data Cloud and Managing Users and Roles
  - If **Datasphere** access is necessary, create a support user by following Option #1 or #2 from KBA 2891554 - How to create a Support User in SAP Datasphere
- **Option #3**
  - Create a dedicated user for SAP Support by entering an email from your company domain, see SAP Help Portal documentation: Managing SAP Business Data Cloud Users and Roles
  - Assign roles- like BDC Administrator
  - Maintain the logon data in Logon Depot, see KBA 1773689 - How to add logon credentials...
  - If **Datasphere** access is necessary, create a support user by following Option #1 or #2 from KBA 2891554 - How to create a Support User in SAP Datasphere

Scenario #2 – Access for BDC SAP Datasphere (DS) and/or SAP Analytics Cloud (SAC) Tenants is needed (e.g. Intelligent App issues)

- **Option #1**
  - Enable SAP support user creation for SAC Tenant. Refer to KBA 3200458 - Creating Support Users in SAP Analytics Cloud **and**
  - Enable SAP support user creation for DS Tenant. Refer to KBA 2891554 - How to create a Support User in SAP Datasphere, refer to Option #2

Scenario #3 – Support User for People Intelligence

- **Option #1**
  - Enable SAP Support user creation for DS and SAC as mentioned in Scenario #2. In addition to that provide SF Support Access and Company ID. Refer to KBA 2088892 - How to Grant Support Access to SAP SuccessFactors Support Staff

Scenario #4 – For provisioning issue in SAP4ME

- **Option #1**
  - Mention the S-User to SAP Support, which is used to generate the issue

Note: Support Users are relevant even if SAP Business Data Cloud tenant has enabled SSO via custom IdP.
